

surface  
treatment

SafeCoat<sup>®</sup> is now

MagnaCoat<sup>®</sup>  
and TempCoat<sup>®</sup>

# SafeCoat® is now MagnaCoat® and TempCoat®

In 2019, Aalberts surface treatment was formed through the merger of the AHC and Impreglon Groups as a business unit of the global technology company Aalberts.

We are one of the world's leading suppliers of functional surface refinements. For more than 50 years, we have been improving component properties according to the local and global requirements of our customers. With more than 50 locations in 14 countries, we are present in the most important industrial regions worldwide.

Highest quality, a broad process portfolio and the passion to deliver the best possible result for you determine our daily work. In order to get a first impression of our capabilities and surface processes, please take a look at our website:

## important note

---

The process SafeCoat® is now available under the product names MagnaCoat® and TempCoat®. These only replace the product name, the benefits of the coating remain the same:

- Improved non-stick properties
- Improved sliding properties
- Corrosion protection
