

Tatabánya

worldwide

- we belong to Aalberts group
- economically efficient coating of mass-produced small parts
- individual solution for demanding individual components
- extensive range of process chemicals for surface technology
- strong financial and investment background
- global key account managers

in Tatabánya

- established in 1999
- increasing turnover since the start
- 7200 m² production area
- 3 working shifts
- > 140 costumers and > 1.400 articles
- modern surface treatment technologies
- high quality full automatic machines
- primarily metal parts coating over 80 % for Automotive sector
- efficient processes with big capacity
- high quality assurance (own test laboratories)
- export relations: Germany, Austria, Slovakia, Romania, Slovenia, Italy, Poland...

our services

Dip spin

- zinc flake coatings: Dörken Delta MKS
- 2 lines
- barrel system, for bulk parts
- high capacity (up to 1,5 To / Hour)
- low coating thickness

Zink thermal diffusion

- dry technology
- cost-efficient solution for bulk parts
- more than 1 ton filling capacity
- high abrasion resistance
- passivation Chrom III

Spraying line

- powder coating
- wet painting: Zinc flake coating and diff. wet paints (e.g. PTFE)
- high capacity
- frame size: 1550 x 810 mm

KTL

- multimetalllic programs (AL, steel, other alloys)
- maximum rack space: 22 m²
- coating thickness: up to 60 µm
- rack size: 2100 x 1050 x 790 mm
